Error Budget & Policy

Team 9 | Date: 11/2/2026

1. Targets

Indicator	Target	Window (time)	Who measures
Accurate/up to date event data	95% of the event details are real and current	Each week	Emmanuel – Data Analysis
Website should be up and running	99% of the time, the website should be up and running	Each sprint (every two weeks)	Samuel – Website manager

2. Budgets

Field	Objective 1	Objective 2
Objective	95% of the event details should be accurate and up to date, this will be ensured	99% of the time the site should be up and running every sprint (2 weeks).
Budget	5% of 20 verified event listings = 1 inaccurate listing per week	1% of 336 hours ~ 3 hours and 20 minutes of downtime per sprint
Policy Action	If budget is spent, halt event listing. Correct every incorrect listing and double the audit sample to 40 for the next week	If the budget is spent, freeze feature implementations for the rest of the sprint. Fix the issue and write a note of the issue and fix
Owner	Emmanuel, Oscar : Own the fixing through curation	Samuel – Site manager
Who we tell, and when	The team in the weekly meetings. The instructor if the budget is spent two weeks in a row.	The team immediately in the group chat. The instructor if the budget is spent

3. Escalation

Level	Example on our portal	Start fixing	Tell the instructor
Severity 1	Portal is down within 48 hours of deadline	immediately	Within 1 hour

Level	Example on our portal	Start fixing	Tell the instructor
Severity 2	A required page is broken, or event details are not real or inaccurate	Within 12 hours	In the weekly update
Severity 3	UI issues, slow pages, typos, misaligned layout	Within the current sprint	Only if it persists

4. Incident Roles

Role	Person this sprint
Incident Leader	Emmanuel
Site Fixers	Samuel & Christian
Communicator	Jazmin
Everyone else	Oscar

5. Incident Review

Section	Content
Summary	The team evidence log gave each interview one ID. Ex. E01 for I-01, E-02 for I-02, etc.) A contradiction memo used E-01 to E-02. An individual contradiction memo used three notes from I-01 alone. The same ID therefore pointed to different evidence in two submitted documents.
Impact	Following E-02 or E-03 from the memo to the team log lands on a different interview, so the memo's claims couldn't be traced to their source. The memo also included a cost figure of $925 that doesn't come from the budget or the estimate. Both were caught before ethe class demo, and no business case number was changed because of them.
Timeline	12 to 16 of October, interviews I-01 to I-04 were recorded. October 19, team log finalized and switched triggers ranked; individuals memos submitted the same day with their own Ids. October 31 mismatched found while preparing the demo. Date fixed: November 2nd.
Contributing Causes	Evidence IDs were assigned in two places. The team log and individual memos were finished on the same day, so the memos couldn't reference the final log. No step was taken to cross check IDs and figures between team and individual documents.
