GRACIAS POR INVITAR, LIVING PROJECT PORTAL, SPRINT 5

Change Log

What changed between 3 and 13 November 2026 and what it affected: the Crisis Response Memo, the wireframes and the mockups delivered as the sprint's documents, no earlier document revised, and the Sprint 4 open items carried.

Version	1.0, Final, revised Nov 13, 2026
Owner	Samuel Alderete
Team	Samuel Alderete, Jazmin Huerta, Christian Lopez-Matulessy, Emmanuel Saenz, Oscar Vargas
Course	CS 4390/5388 Software Project Management, The University of Texas at El Paso, Fall 2026
Web	https://gpi-portal.onrender.com/sprint-5/change-log/

What this log is

Section 8 of the course guidelines asks every sprint page after Sprint 1 for a change log: what was revised from the prior sprint's version, why, and what downstream pages or documents the change affected. This is Sprint 5's log. It covers 3 to 13 November 2026. No Sprint 1, 2, 3 or 4 document was revised during it; the sprint's three public documents are new, and the portal itself changed only to carry them.

Each entry names what changed, the reason the record gives for it, and what it touched. The record line of each entry links the history of the file in the portal's repository, where every change to it can be read.

The earlier documents, carried

The Crisis Response Memo works from the earlier documents and changes none of them. Its decisions and its recommendation answer the course's scenario, not the project's own plan, so the Project Charter, the Project Budget, the Service Level Indicators and the Error Budget and Policy stay at their current versions. The three changes the Sprint 3 change note proposed to the Business Strategy still wait on its owner.

Crisis Response Memo

1.0, the team's memo, 12 November

What changed. A new document, delivered as a PDF with a cover page on the portal: the team's memo to the CEO on the course's crisis scenario, in seven sections from situation and triage to the CEO briefing, with a response log and a note on the team's use of AI, signed by all five members. The file on the portal is the six-page version made on the evening of 12 November at the portal lead's direction: typos corrected, the layout tightened, and repeated passages condensed to meet the six-page limit. No figure, decision or recommendation changed in that pass.

Why. The sprint's crisis exercise: one incident, three emergencies, and one memo that triages them, logs the decisions, sets up governance, measures the reliability impact, updates the risks, plans the transition and makes one recommendation.

What it affected. No earlier document. Its three risk entries, in the format of the budget's Step 9 risk table with an owner, an early warning signal and a trigger response each, are the first the team has written in that form; the risk register itself is still open below.

Record. The memo's file and its cover.

Wireframes

1.0, drawn 3 November

What changed. A new document, delivered as a PDF: the event site's screens as wireframes on nine pages, a map of the screens and the links between them, seven desktop screens with numbered notes, and the phone. Drawn in Lucidchart by Claude at the portal lead's direction, from the site as it stood that day, and exported one board a page. Its owner is Samuel Alderete, Portal Lead.

Why. The portal lead asked for the site's screens as wireframes in Lucidchart on 3 November, held them back until the sprint they belonged to was settled, and placed them in Sprint 5 on 13 November.

What it affected. Nothing in the documents. The mockups follow it page by page.

Record. The file and its cover.

Mockups

1.0, made 11 November

What changed. A new document, delivered as a PDF: every screen of the event site at full fidelity, desktop and phone, in the order of the wireframes, after four boards on the step from wireframe to mockup, colour, type and components. Made by Claude at the portal lead's direction from stills of the live site. The portal's copy has its photographs saved again at a lower resolution, from 17 MB to 8.8 MB; its text and drawings are unchanged. Its owner is Samuel Alderete, Portal Lead.

Why. The step after the wireframes, at the portal lead's direction, placed in Sprint 5 with them on 13 November.

What it affected. Nothing in the documents.

Record. The file and its cover.

The sprint's scope

Sprint 5 holds the crisis exercise and the event site's wireframes and mockups. Retrospectives and peer evaluations are submitted through Blackboard and are never published here.

Open items from this log

Carried from the Sprint 4 log, with no change recorded since:

- The first Thursday audit of 20 listings and the uptime monitor on the live site, with the log the measurement plan names, so the error budgets have numbers to report against.
- One place for evidence IDs, and a cross-check between the team log and the individual memos before either is submitted.
- The Business Strategy's revision from the Sprint 3 change note, by its owner, with a new version number and a note in the next log.
- The risk register, with the three candidate entries from the field study and their owners confirmed.
- Carried from Sprint 2: the Market Research's 1.3 note, and the schedule gap between the charter's eight weeks and the 12.1 expected weeks for the slice.

Generated from the portal source at build time. The web page and this PDF are two renders of the same document. Revision history: v1.0 (Nov 13, 2026) First Sprint 5 log, written from the repository's record and the documents. Entries cover 3 to 13 November 2026.
